

SRO TECHNOLOGY
Solutions in Measurement

Getting to know SRO Technology

+ To work with us call us on 07 3395 6136
or visit srotechnology.com

Our vision

SRO Technology aims to deliver you the best in measurement solutions.

Our approach to measurement and weighing is unrivalled and we're confident we have the best team working for us.

If you're not already working with us, we can't wait for you to start.

Our businesses include:

+ **SRO TECHNOLOGY**
Measurement and Weighing Solutions

+ **ENWISE**
Backbone Infrastructure Systems

+ **RAMSEY**
Measurement Instruments by Technicians,
for Technicians

You can count on us to deliver.

What sets us apart

Every day we work with customers across Australia's core service industries to help them make better business decisions when it comes to precision weighing and measurement.

We're there to ensure your measurement instruments are reliable and highly accurate, every time.

What you can expect by working with us:

+ We're laser-focused

We'll get your instruments reading accurately and won't sell you products you don't need.

+ We're long-term thinkers

We value building sustainable, long-term partnerships with our customers. Churn and burn is not our thing.

+ We keep it simple

We simplify and standardise measurement equipment. Expect simpler inventory and lower operating expenses.

+ We're your trustworthy team

We are dedicated to supporting your business operations, using precise and dependable data to drive your best decisions - on and off site.

+ We offer unrivalled accessibility

We hold stock of key critical spares all year round so you can maximise your uptime. With our long-term industry partners, we have access to a range of the best global brands and products in the industry. We're also the global distributor of Ramsey products, so you know you'll be working with the best instruments on the market.

Where we've come from

SRO Technology started as a 4-person service company by Ramsey service engineer, Stephen O'Brien.

SRO expanded from a small warehouse in Sutherland Shire, Sydney to opening the Brisbane HQ in Geebung.

SRO acquired P-Tronik and later sold it in 2022.

SRO expanded to open the Perth, and then Adelaide offices. By 2023, SRO was also Thermo Fisher's largest Australian distributor of Ramsey products.

1988

2016

2017

2023

2013

2016-2021

2022

2024

SRO was purchased by the current owners, Pete and Iain. In 10 years, the company has grown from 5 to 45+ people, servicing Australia-wide in 5 locations.

CEO Andy Clarke was pivotal in growing the business to what it is today. He sadly passed away in 2021, leaving his young family behind.

SRO acquired Emerald's local electric and refrigeration specialist business, Enwise.

SRO acquired Ramsey from Thermo Fisher with bold plans to grow our Australian and global customer base. Our goal is to bring the full supply chain back online in 2025.

Where we're going

We're excited about our future and have bold expansion plans - both in Australia and globally.

We would love for you to join us on this journey!

By 2030, across our core businesses we want to be:

Recognised as the #1 measurement company in bulk materials handling across Australia and New Zealand.

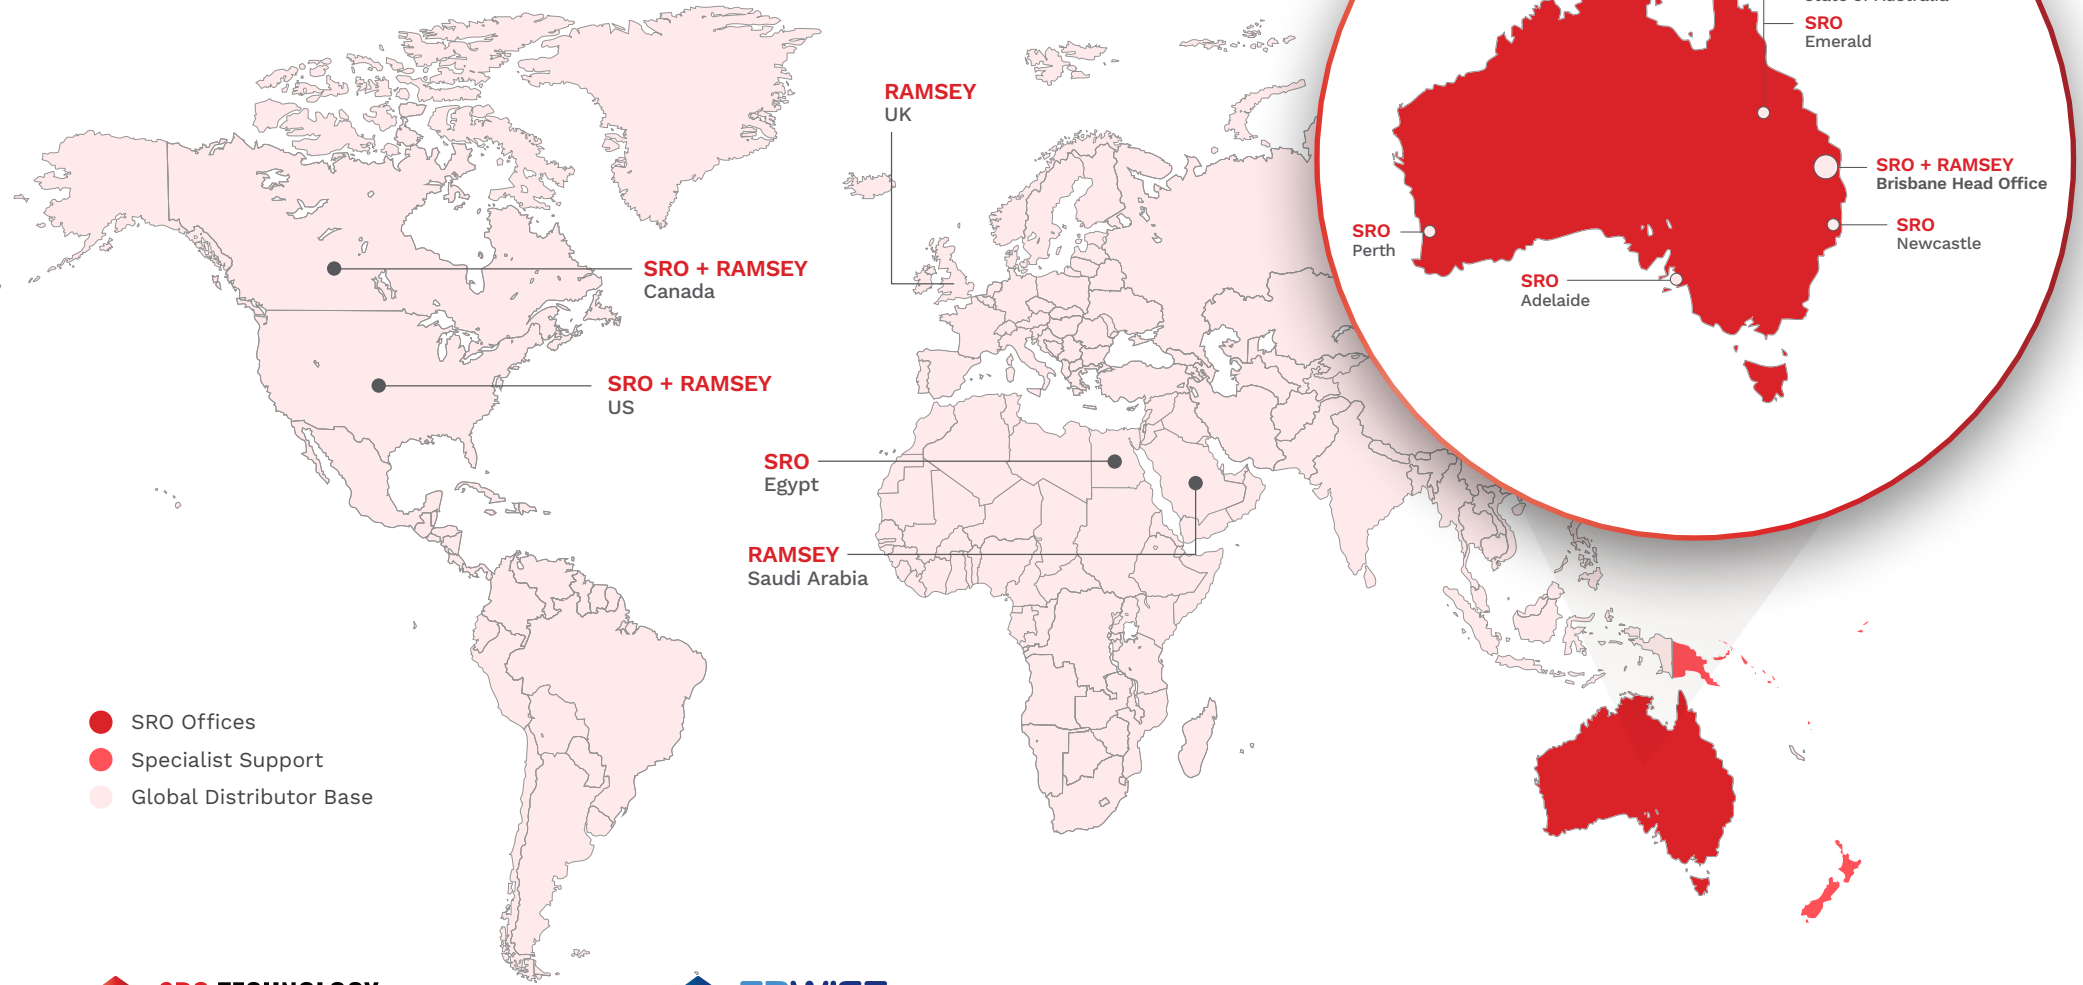

Industry-recognised as the national provider of commercial and industrial operating infrastructure in Australia.

RAMSEY

Re-established as the best-in-class global leader in bulk materials handling technology.

Where we operate

- SRO Offices
- Specialist Support
- Global Distributor Base

Based in Brisbane with offices in Emerald, Newcastle, Perth and Adelaide. SRO has a global presence in US, Canada and Egypt.

Based in Emerald but services every state of Australia.

Based in Brisbane with full Australian reach plus distribution to the US, Canada, UK and Saudi Arabia.

What we do

Our Services

Dynamic Weighing Solutions

A game changer for load monitoring, Dynamic Weighing provides real-time load monitoring capabilities to optimise your loading procedures.

Our Dynamic Weighing Service Manager, Aiden, can help you with the supply, installation and maintenance of:

- + Belt Scales
- + Tramp Metal Detectors
- + Weigh Feeders
- + Impact Weighers
- + and more.

Reach out to Aiden for all your Dynamic Weighing needs.

Meet Aiden Worth

Dynamic Weighing Service Manager

With 15+ years' experience, Aiden is your go-to guy for navigating the evolving demands of dynamic weighing across industry.

What we do

Our Services

Weighing Solutions

We have combined decades of expertise across weighing compliance, calibration and maintenance - all crucial services if you rely on accurate measurements for your operations.

Our Weighing Service Manager, Eugene, can help you with the supply, installation and maintenance of:

- + Weighbridges
- + Scales
- + On-Board Weighing
- + Product Inspection
- + Software
- + and more.

Reach out to Eugene for all your Weighing needs.

Meet Eugene Greco

Weighing Service Manager

Based in South Australia, Eugene is well-known for his ability to work well under pressure and provide the best weighing solution for any job.

What we do

Our Services

Process Instrumentation Solutions

We're the go-to team for providing onsite process instrumentation solutions - from commissioning and testing to calibration, breakdowns and repairs.

Our Process Instrumentation Service Manager, Darren, can help you with the supply, installation and maintenance of:

- + Level
- + Temperature
- + Flow
- + Pressure
- + Analytical
- + Control Valves
- + Density
- + Sensors
- + Gas Detection
- + Pneumatic Equipment
- + and more.

Reach out to Darren for all your Instrumentation needs.

Meet Darren Matuku

Process Instrumentation Service Manager

With 15+ years' experience, Darren brings invaluable technical expertise and leadership to support all your instrumentation needs.

Our products

In 2024 we acquired the world recognised product line Ramsey from Thermo Fisher. Ramsey has been a global industry-loved, trusted brand and one of SRO's most-used product lines with our Australian and International customers.

RAMSEY

Ramsey products

With many of these highly respected Ramsey products removed from the market back in 2022, we've made it our purpose to:

- + **Bring back** the popular Ramsey products to our customers and distributors worldwide.
- + **Rebuild** the manufacturing supply chain while sustaining the unmatched quality, accuracy and reliability of Ramsey products.
- + **Re-establish** global distribution.

Reach out to Jeff, our very own Ramsey man, to enquire about ordering or re-ordering Ramsey products for your site.

Meet Jeff Morton

Ramsey Sales Manager

Jeff's experience is unmatched, having worked for measurement product conglomerates, including Ramsey back when it was owned by Thermo Fisher. Now, Ramsey has found its new home with us.

End-to-end support

We produce, install, calibrate, and maintain the instruments that measure the weight and volume of materials across hundreds of Australia's mine sites, quarries, and food and agricultural sites.

You can count on us for:

Site Audit and Planning

We can provide a comprehensive assessment of your site handling processes, enabling us to identify instruments that are not working correctly. Backed by data, we outline which devices are not functioning correctly, which need calibration, and which need repair - or even replacement - and prioritise them for you.

Repair and Retrofitting

When measurement devices malfunction or fail, our repair and retrofitting specialists can be there quickly. Servicing hundreds of sites across Australia, our repair and retrofitting service offers fast, reliable replacement and repair of broken parts so you can get your site equipment back up and running quickly.

Design and Commissioning

We design and commission instruments and services to specifically address your needs. We're brand-agnostic with products including Ramsey, CST, Schenck, Webtech, Techweigh, Gamma-Metrics, Siemens, and Vega Mintrac Equipment. Our team of design engineers is experienced in developing conceptual designs for engineering, procurement, and construction management teams and providing customised measurement solutions to plant managers.

Maintenance and Calibration

Our satellite locations across Australia offer comprehensive maintenance and calibration services across the mining, processing, quarry, bulk materials handling, agriculture, and food industries. With precision calibration checks, we can assess and adjust your site equipment sensors to ensure they are generating accurate readings to continue your operations and maximise uptime.
